

## How to access the code

### 1) Pick Rate Access Code

The screenshot shows a hotel booking interface. At the top, there are four main sections: 'ADULTS & CHILDREN' (2/0), 'DATES OF STAY' (Jun 30-Jul 4), 'ACCOMMODATIONS' (Select), and 'TOTAL' (\$0). Below this is a navigation bar with 'Add More Rooms'. The main content area is titled 'ROOMS' and features a room image on the left with a 'GOOD FOR SHORT STAYS' badge. A modal window titled 'Add Code' is open, showing a dropdown menu with 'Rate Access Code' selected and highlighted by a red box. Below the dropdown are 'CANCEL' and 'ADD' buttons. To the right of the modal is a list of rate options: 'Stay 4 Nights & Save' (\$198), 'Book Early & Save' (\$201), 'Stay 3 Nights & Save' (\$203), and 'Flexible Rate' (\$226). At the bottom right, there is a price of '\$198' and a 'BOOK' button.

### 2) Insert the code "HPMC2024" and click add

The screenshot shows the same hotel booking interface as above. The 'Add Code' modal is open, and the dropdown menu now shows 'HPMC2024' entered into the text field, which is highlighted by a red box. The 'ADD' button is visible below the text field. The rest of the interface, including the room image, rate options, and 'BOOK' button, remains the same.

### 3) Pick "Preferred Partner Dynamic Rate" and book
